ANY MEDIA, ANY OPERATING SYSTEM, ANY SITUATION

We have recovered data from a wide variety of data media, including hard disks, diskettes, CDs, DVDs, USB drives, flash cards, RAID servers and every possible media that stores data. Regardless of what operating system you are running on, we can help you.

Your system may be running on Windows, DOS, MAC, Linux, Solaris, z/OS, and your data loss might be due to virus infection, mechanical or electrical failure, system malfunction, accidental deletion, reformatting, fire or water hazards. We have successfully recovered data in all these situations.

YOUR DATA IS IMPORTANT

In all data loss situations, you must entrust your data media to a reliable specialist as a substandard recovery effort on an already damaged media will deprive you further chance of successful recovery. We provide top notch service and guarantee the strictest data confidentiality via our (or the client's) non-disclosure agreement.

I HAVE LOST MY DATA!

Have no fear. With an innovative spirit, we will show you the possibilities of rescuing your data from extreme situations even if it means to "revive" your "dead data media".
